

REGIS 3 OPAL

aller Verbindungen und Elemente des Beleuchtungssystems wird empfohlen. Die Leuchtquelle erwärmt sich stark. Den Austausch der Leuchtquelle nach dem Erkalten des Produkts durchführen. Zeichnungen: Im Produkt müssen Leuchtquellen verwendet werden, die den in der Anleitung gegebenen Parametern entsprechen.

ERLÄUTERUNGEN ZU DEN VERWENDETEN MARKIERUNGEN UND SYMBOLEN

P1: Nennspannung, Frequenz.
P2: Nennleistung.
P3: Linearleuchte.
P4: Lampensockel / Leuchte.
P5: Das Produkt erfüllt die Anforderungen der EU-Richtlinien.
P6: Das Produkt darf nicht mit wärmedämmendem Material bedeckt werden.
P7: Geschützt gegen feste Fremdkörper mit mehr als 12mm Durchmesser.
P8: Klasse I Produkt, bei dem als Schutz vor elektrischem Schlag außer der Grundisolation auch zusätzliche Sicherheitsvorrichtungen in Form eines zusätzlichen Schutzkreises stehen, an den man die Schutzleitung der stationären Versorgungsanlage anschließen kann.
P9: Nur für die Verwendung im Innenbereich.
P10: Das Symbol bezeichnet den Mindestabstand, den die Leuchte (den Lichtkegel) von den Objekten und Personen halten muss.
P11: Gesplitterte oder zerbrochene Teile (Lampenschirm, Abschirmung, Schutzscheibe) müssen sofort ersetzt werden.

Umweltschutz
Auf Sauberkeit und die Umwelt achten. Wir empfehlen die Trennung der Verpackungsmaterialien.
P12: Diese Kennzeichnung weist auf die Notwendigkeit hin, gebrauchte elektrische und elektronische Geräte selektiv zu sammeln. Solche gekennzeichneten Produkte dürfen nicht zusammen mit normalem Müll entsorgt werden. Bei Zweifelsbehandlung droht eine Geldstrafe. Diese Produkte können schädlich für die Umwelt und die menschliche Gesundheit sein und erfordern eine spezielle Form der Umwandlung / der Rückgewinnung / des Recyclings / der Unschrädlighmachung. Informationen zu Sammel-/Abfallplätzen erteilen die lokalen Behörden oder die Verkäufer dieser Produkte. Gebrauchte Produkte können auch an den Verkäufer zurückgegeben werden, wenn die Zahl der alten die der neuen nicht übersteigt. Die entsprechenden Informationen sind auf der Verpackung angegeben. Länder sind die rechtlichen Bestimmungen des jeweiligen Landes anzuwenden. Wir empfehlen, den Händler unseres Produkts im jeweiligen Gebiet zu kontaktieren.

FORKLÄRUNG / HINWEISE
Die Nichtbeachtung der Empfehlungen der vorliegenden Hinweise kann u.a. zu Bränden, Verbrennungen, Stromschlägen, physischen Verletzungen und anderen materiellen und immateriellen Schäden führen. Lesen Sie die Hinweise und die Anweisungen des Herstellers. Karlux S.A. haftet nicht für Schäden, die aus dem Nichtbeachten der Empfehlungen der vorliegenden Hinweise resultieren.

FR DESTINATION / APPLICATION
Produit à l'éclairage des bureaux et aux destinations générales.

INSTALLATION
Modification techniques réservées. Avant de commencer l'installation lisez le mode d'emploi. Installation doit être effectuée par une personne possédant les certificats d'aptitude convables. Toutes les opérations doivent être effectuées avec la tension indiquée. Il faut respecter les principes fondamentaux de l'installation. Source de produit possédée contact / borne de protection. Manque de raccordement du câble de protection entraîne le risque de commotion électrique. Avant la première mise en marche il faut assurer si le fusage mécanique est correct ainsi que la connection électrique. Avant de fixer ou d'échanger la lampe il est à vérifier le type de lampe utilisé dans le luminaire. Il est nécessaire d'utiliser les lampes dont les caractéristiques sont conformes au système de stabilisation indiquées dans le manuel.

CARACTERISTIQUES FONCTIONNELLES
Utiliser le produit uniquement à l'intérieur des locaux.

RECOMMANDATIONS D'EXPLOITATION / MAINTENANCE
Faire l'entretien avec l'alimentation coupée une fois le produit refroidi. Nettoyer uniquement avec les tissus secs et délicats. On ne peut pas utiliser les produits nettoyeurs chimiques. Assurer l'accès libre de l'air. Produit ne peut pas être utilisé dans l'endroit aux conditions défavorables par exemple: poussière, eau, humidité, vibrations etc.. Mettre en place le produit loin des sources de chaleur. Produit peut se détacher, jusqu'à la température élevée. Tous les câbles et éléments fonctionnent avec le luminaire sont à mettre en place de façon à ne pas permettre qu'ils touchent les éléments du système déclaireur se chauffant. Il est recommandé de contrôler si tous les raccordements et les éléments du système sont corrects. Source de produit possédée chauffe jusqu'à la température élevée. Faire changer la source de lumière après avoir éteint le produit: voir les images. Utiliser dans le produit les sources de lumière aux caractéristiques indiquées dans le manuel.

EXPLICATION DES MARQUAGES ET DES SYMBOLES UTILISES
P1: Tension nominale, fréquence.
P2: Puissance nominale.
P3: Lampe fluorescente linéaire.
P4: Coudoir / douille.
P5: Produit conforme aux Directives de l'Union Européenne (UE).
P6: Produit n'est pas adapté à le couvrir avec du matériel de thermoisolation.
P7: Protection contre les états solides dépassant 12mm.
P8: Classe I produit, pour lequel la protection contre la commotion électrique est assurée, outre l'isolement de base, les moyens de sécurité supplémentaires sous forme du circuit de protection supplémentaire à lequel il faut brancher le câble de protection constante de l'installation à l'intérieur des locaux.
P9: Utiliser uniquement à l'intérieur des locaux.
P10: Symbole signifie la distance minimale qui peut avoir lieu entre le luminaire (sa source de lumière) et les objets sensibles. Voir les images.
P11: Il faut immédiatement échanger le globe, l'écran, la vitre de protection cassé ou brisé.

PROTECTION DE L'ENVIRONNEMENT
Gardez la propreté et protégez l'environnement. La ségrégation des déchets d'emballage est recommandée.
P12: Ce marquage indique la nécessité de la collecte sélective des appareils électriques et électroniques usés. Les produits marqués de cette façon ne peuvent pas, sous la peine multimerielle, être jetés avec les déchets ordinaires. Ces produits peuvent constituer des nuisibles pour l'environnement et pour la santé des hommes, il exigent les formes spéciales de la transformation / r de la récupération / r du recyclage et de la neutralisation.

REMARKS / INDICATIONS
Do not cover the product with thermal insulation material. Do not use the product in unfavorable environment, eg. dust, moisture, water, vibrations, etc.. Mount the product far from heat sources. Product may heat up to a higher temperature. Place all the leads and cables in the place where the future ensuring no contact with the parts of the lighting system that become heated. The inspection of all connections and elements of the lighting system is recommended. The light source becomes heated to a high temperature. Change the light source after the product has cooled down. See the images. Use only light sources with parameters provided in the manual must be used in the product.

FUNCTIONAL CHARACTERISTICS
Product for indoor use.
SAFETY GUIDELINES / MAINTENANCE
Any maintenance work must be performed when the power supply is cut off and the product has cooled down. Clean only with soft and dry cloths. Do not use chemical cleaning products. Ensure free access to the product. Do not use the product in an unfavorable environment, eg. dust, moisture, water, vibrations, etc.. Mount the product far from heat sources. Product may heat up to a higher temperature. Place all the leads and cables in the place where the future ensuring no contact with the parts of the lighting system that become heated. le istruzioni. L'assemblaggio deve essere effettuato da una persona con appropriata competenza. Eseguire qualsiasi operazione con l'alimentazione disinnescata. È necessario adottare le precauzioni di sicurezza. Le istruzioni di assemblaggio vedi illustrazioni. Il prodotto possiede un contatto/morsetto di protezione. Il mancato collegamento del cavo di protezione genera il rischio di scossa elettrica. Prima del primo utilizzo, occorre accertarsi che il fissaggio meccanico e la connessione elettrica siano corretti. Prima dell'uso, assicurarsi della sostituzione della lampada, verificare il tipo di lampade utilizzate nel dispositivo di illuminazione. È necessario utilizzare lampade i cui parametri siano conformi al sistema di stabilizzazione indicato nel manuale.

CARATTERISTICHE FUNZIONALI
Prodotto da utilizzare in ambienti interni.
RECOMMANDATIONS D'EXPLOITATION / MAINTENANCE
Équippede la maintenance sous le l'alimentation disinnescata e dopo il raffreddamento del prodotto. Pluie exclusivement avec un panno delicato e asciutto. Non utilizzare il prodotto senza la protezione elettrica. È necessario assicurarsi che il fissaggio meccanico e la connessione elettrica siano corretti. Prima dell'uso, assicurarsi della sostituzione della lampada, verificare il tipo di lampade utilizzate nel dispositivo di illuminazione. REMARKS / INDICATIONS
Do not cover the product with thermal insulation material. Do not use the product in unfavorable environment, eg. dust, moisture, water, vibrations, etc.. Mount the product far from heat sources. Product may heat up to a higher temperature. Place all the leads and cables in the place where the future ensuring no contact with the parts of the lighting system that become heated. The inspection of all connections and elements of the lighting system is recommended. The light source becomes heated to a high temperature. Change the light source after the product has cooled down. See the images. Use only light sources with parameters provided in the manual must be used in the product.

FUNCTIONAL CHARACTERISTICS
Product for indoor use.
SAFETY GUIDELINES / MAINTENANCE
Any maintenance work must be performed when the power supply is cut off and the product has cooled down. Clean only with soft and dry cloths. Do not use chemical cleaning products. Ensure free access to the product. Do not use the product in an unfavorable environment, eg. dust, moisture, water, vibrations, etc.. Mount the product far from heat sources. Product may heat up to a higher temperature. Place all the leads and cables in the place where the future ensuring no contact with the parts of the lighting system that become heated. The inspection of all connections and elements of the lighting system is recommended. The light source becomes heated to a high temperature. Change the light source after the product has cooled down. SK ANVÄNDNING
Produkten är avsedd för kontorsbelysning och allmänna ändamål.
MONTERING
Montera förbukt för tekniska förhållanden. Läs igenom bruksanvisningen före monteringen. Monterings sk utföras av berörig person. Alla handlingar ska utföras med spänningen avstängd. Iaktta särskilda försiktighets. Monteringsinstruktioner: se illustrationer. Produkten är skyddad mot fasta främmande kroppar med mer än 12mm diameter. Produkten har ett skydd för elektriska stötar. Kontrollera före första användning att den mekaniska infästningen och den elektriska anslutningen har utförts på ett korrekt sätt. Före användning av lamporna kontrollera vilken lampor som passar i armaturen. Använd lampor med parametrar som är i samsvar med det stabiliserings- och tändsystem som finns i produktens lampor.
FUNKTIONELLA EGENSKAPER
Produkten är avsedd för inomhusanvändning.
REKOMENDATIONER FÖR DRIFT / UNDERHÅLL
Utför underhåll med matningen avstängd efter att produkten har svalnat. För rengöring använd endast mjuka och torra dukar. Använd inga kemiska rengöringsmedel. Täck inte över produkten. Skärskallt god luftcirkulation. Använd inte produkten där det råder risk för elektriska stötar, skadliga damm, vatten, n.m.t. vibrationer m.m. Monterat produkten långt från värmekällor. Produkten kan bli varm till en förhöjd temperatur. Alla ledningar och extra säkerhetsåtgärder i form av en extra skyddskärl till vilken en extern skyddskärl ska anslutas.
P1: Fara avseende inomhus.
P2: Symbolen anger det minsta avståndet mellan armaturen (dess ljuskälla) och ytor och föremål som ska belysas.
P3: Tension nominale, frekvens.
P4: Skaf / sockel.
P5: Produkt överensstämmer med kraven i Europeiska gemenskapens (EG) direktiv.
P6: Varan ska inte täckas med termoisoleringsmaterial.
P7: Skydd mot fasta föremål större än 12mm.
P8: Klass I Produkten är utrustad med skydd mot elektriska stötar genom grundläggande isolering och extra säkerhetsåtgärder i form av en extra skyddskärl till vilken en extern skyddskärl ska anslutas.
P9: Fara avseende inomhus.
P10: Symbolen anger det minsta avståndet mellan armaturen (dess ljuskälla) och ytor och föremål som ska belysas.
P11: Bygga stannad omedelbart i den lilla o i schermo rotto o danneggiato, con l'assistenza di un professionista qualificato.
P12: Questa etichetta indica la necessità di raccolta differenziata dei rifiuti di apparecchiatura elettrica ed elettronica. I prodotti con questa etichetta, a pena di ammenda, non possono essere smaltiti nella spazzatura ordinaria insieme ad altri rifiuti. Questi prodotti possono essere dannosi per l'ambiente e la salute umana, e richiedono particolari forme di trattamento / recupero / riciclaggio / neutralizzazione. Informazioni sui punti di raccolta rifiuti sono disponibili presso le autorità competenti. Source de produit possédée chauffe jusqu'à la température élevée. Faire changer la source de lumière après avoir éteint le produit: voir les images. Utiliser dans le produit les sources de lumière aux caractéristiques indiquées dans le manuel.
